Summary

As a seasoned Senior Fullstack Developer with over 5 years of hands-on experience in JavaScript and TypeScript, I specialize in crafting robust applications using ReactJS, NextJS, Angular, NestJS, NodeJS, ExpressJS, and GraphQL. My expertise lies in developing dynamic user interfaces that excel in performance optimization and designing APIs that address organizational needs, utilizing sound engineering principles and architecture.

Throughout my career, I have consistently delivered successful projects in collaborative environments, aligning them seamlessly with business objectives. I have a proven track record in designing both GraphQL and RESTful APIs, integrating data models on the frontend, and managing databases to ensure well-tested and maintainable code.

I am dedicated to staying current with the latest trends and best practices in frontend and backend development, continuously expanding my knowledge and integrating new technologies and approaches into my work. My passion for coding, meticulous attention to detail, and strong problem-solving skills make me an invaluable asset to any development team.

My technical expertise, commitment to continuous improvement, and ability to consistently deliver outstanding results make me confident that I am the perfect fit for your organization.

Skills

- Communication and interpersonal skills
- Agile software development
- Version Control System: Git, Github
- Programming Languages: JavaScript, Typescript
- Front-End Libraries: ReactJs, Angular, HTML5, CSS3, Redux, Recoil, Apollo-client, Apollo ReactiveVar state management, Nextjs, Material-UI, Bootstrap, TailwindCss, AntD, JQuery
- Back-End Skills: NodeJs, NestJs, ExpressJs, GraphQL
- Database Skills: MongoDB, Postgres, and MYSQL

- Docker
- Continuous development and continuous integration (CI/CD)
- Testing | Test driven development
- Technical documentation and problem solving skills
- Responsive web design
- Jira and confluence

Experience

Senior Fullstack Developer

Mar 2023 - Nov 2023

Freeing Returns, Incorporation(under Punch LLC).

Remote, Atlanta, United State

- Responsible for implementing both UI and server side of the user and Role management section of the system
- Responsible for implementing both UI and server side for creating new holding companies and sub companies that belongs to the holding company
- Responsible for handling both UI and server side for system configuration and settings
- Collaborated with other developer's code reviews, design and planning.

Senior MERN Stack Developer

Sep 2021 – Current

Punch LLC

Remote, San Francisco

- Collaborated with other developers by using ReactJs, GraphQL, Nextjs and various other frontend tools to build and maintain a productivity tracker application: <https://tracker.zwilt.com/>
- Collaborated with senior developers to troubleshoot and debug code, improving the quality and reliability of applications.
- Contributed to creating a system for client and talent hiring resulting in an 85% increase in revenue generation for the company: App.zwilt.com
- Created documentation for new applications to support end-users.

- Responsible for maintaining both server-side and frontend codebase

Front-End Developer

May 2020 – May 2022

Huawei Technologies

Lagos, Nigeria

- Successfully developed and implemented various dashboards and applications for internal use to monitor activities across different telecommunications networks managed by Huawei Nigeria using Vanilla JavaScript HTML, CSS, and jQuery.
- Developed a series of applications and dashboards including GIS (Magnifier-In-The-Sky), a system designed to monitor outages occurring in various regions of the country, and promptly alert field management engineers within the affected areas.
- Effectively collaborated with the software design team to address application issues and troubleshoot.
- Identified weaknesses in software applications, discussed solutions verification protocols and proposed automated test procedures.
- Headed a team that had the responsibility of continuously reviewing software bugs and reports.

Fullstack Developer

Apr 2018 – May 2020

Hibsofttech Consulting

Suit 3 Felix Peace Estate Sangotedo Ajah Lagos, Nigeria

- Successfully built a hotel management application that allows customers to easily book rooms and perform other services online while also allowing the management to manage their staff and track staff KPIs: <https://hillsbaygroup.com/>
- Took ownership of building a tenancy web application for a real estate client that allows them to manage both their properties and tenants using ReactJs, NodeJs, GraphQL, and MYSQL database.
- Successfully used a WordPress template in building a beauty pageant website for a client. <https://missuniversenigeria.org/>
- Collaborated in cross-functional teams to ensure seamless integrations of front-end and back-end systems, resulting in faster project delivery.

- Actively participated in code reviews to ensure code quality and adherence to best practices.

Education and Training

2011-2016	Bachelor of Engineering in Computer Engineering Enugu State University of Science and Technology, Enugu, Nigeria
2010-2011	Diploma in Computer Software and Applications Kenneth Computer Education College, Oji-River Enugu State.
2003-2009	Senior School Certificate Government Technical College, Obubra, Cross River State

Professional Certifications/Trainings Attended

Certificate Name	Issuer
• React Learning Program	Andela
• Web Developer and Technology Management	HibSofTech Consultant
• Remote Delivery Certificate	Huawei Technologies
• Cybersecurity Certification	Huawei Technologies
• Proposition Competence Maintenance Service	Huawei Technologies
• General Digital Engine Programming & Orchestration Skill	Huawei Technologies

Supported & Completed Projects

1. Client: Freeing Returns (2023)

Project Name: Solving Total Retail Loss

Location: Remote, Atlanta USA

Roles: Fullstack Developer

Website: <https://freeingreturns.com/>

Core Technologies Used: ReactJs, NodeJs, GraphQL, Apollo Federation, NextJs, ExpressJs, Postgres, Store Procedures, Typescript, JavaScript, Material-UI, and AWS

2. Client: Punch LLC (2023)

Project Name: Zwilt Application

Location: Remote, San Francisco, USA

Roles: MERN Stack Developer

website: <https://app.zwilt.com/>

Core Technologies Used: ReactJs, NodeJs, GraphQL, ExpressJs, NextJs, Typescript, JavaScript, MongoDB, Material-UI, and Elastic-Search

3. Client: Punch LLC (2023)

Project Name: Zwilt Productivity Tracker

Location: Remote, San Francisco, USA

Roles: MERN Stack Developer

website: <https://tracker.zwilt.com/>

Core Technologies Used: ReactJs, NodeJs, GraphQL, ExpressJs, NextJs, Typescript, JavaScript, Material-UI, MongoDB, and Electron

4. Client: Zillow Nigeria Limited (2023)

Project Name: ZPropTenancy Application

Location: Lagos Nigeria

Roles: Fullstack Developer(Contract)

website: Not published yet

Core Technologies Used: ReactJs, NodeJs, GraphQL, NestJs, Typescript, JavaScript, Material-UI, and MYSQL

5. Client: Zillow Nigeria Limit (2022)

Project Name: Estate Facility Management Application for Web and Mobile Users

Location: Lagos State

Roles: Fullstack Developer (Contract)

Website: <https://www.zillow.com/>

Core Technologies Used: ReactJs, NodeJs, ExpressJs, JavaScript, Bootstrap, and MYSQL

6. Client: Hillsbay Group Limited (2021)

Project Name: Digitalization of the Business Payment gateway

Location: Lagos State

Roles: Application Developer

Website: <https://hillsbaygroup.com/>

Core Technologies Used: HTML5, CSS3, ReactJs, NodeJs, NestJs, Typescript, JavaScript, Chakra-UI, PHP, and MYSQL

7. And many other Software Projects and IT Support Services
